

ISTQB® Certified Tester – Foundation Level

The Foundation Level qualification is aimed at anyone involved in software testing. This includes people in roles such as testers, test analysts, test engineers, test consultants, test managers, user acceptance testers and software developers.

This Foundation Level qualification is also appropriate for anyone who wants a basic understanding of software testing, such as project managers, quality managers, software development managers, business analysts, IT directors and management consultants. Holders of the Foundation Level certificate will be able to go on to a higher level software testing qualification.

The Foundation Level deals with exercises, methods and techniques of software testing. The participants learn all steps of the software testing process, from the planning and specification to the conducting and monitoring of tests.
