

UXQB® Certified Professional for Usability and User Experience – Foundation Level (CPUX-F)

This Foundation Level certification is intended for professionals who want to ensure that their fundamental usability and UX knowledge is up-to-date. It is beneficial if you wish to pursue advanced certification, for example as usability tester, user requirements engineer, information architect or usability engineer. Also stakeholders who cooperate with usability professionals and want to familiarize themselves with basic usability terms, concepts and processes will benefit from this certification, allowing them the ability to thereafter answer the question “Do you speak usability?” affirmatively. Examples of such stakeholders are project managers, software developers, designers, users, product managers and marketing people.

Attendees holding the UXQB® Certified Professional for Usability and User Experience – Foundation Level (CPUX-F) certificate are familiarized with the basic terms and concepts from the field of usability and user experience.

The main focus areas of this certification are:

- Usability principles and guidelines
- Understanding and specifying the context of use
- Specifying the user requirements and interaction between user and system
- Usability testing
- Usability inspections and user surveys
- Process management and use of methods
